

CHANGES IN THE MEETING: The status of the Commission meeting to consider and act upon the following item was changed from open to closed:

1. Secretary of Labor v. Lone Mountain Processing, Inc., Docket No. KENT 98-254-D. (Issues include whether the Mine Act's temporary reinstatement remedy applies to an applicant for employment.)

Because agency business so required, it was determined by a majority vote of the Commission on August 28, 1998, to change the status of this meeting from open to closed [Pursuant to 5 U.S.C. § 552b(c)(10)]. Chairman Jordan and Commissioners Marks and Beatty voted to change the meeting status to closed and Commissioners Riley and Verheggen voted to keep the meeting status open. No earlier announcement of the change was possible.

BILLING CODE 6820-MA-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-302]

In the Matter of Florida Power Corporation, et al.; Crystal River, Unit 3; Revocation of Exemption

I

The Florida Power Corporation, et. al. (FPC or the licensee) is the holder of Facility Operating License No. DPR-72, which authorizes operation of Crystal River Unit 3. The license provides that the licensee is subject to all rules, regulations, and orders of the Nuclear Regulatory Commission (the Commission) now or hereafter in effect.

The facility consists of a pressurized-water reactor at the licensee's site located in Citrus County, Florida.

II

With respect to certain generic issues for facilities operating prior to January 1, 1979, except to the extent set forth in 10 CFR 50.48(b), 10 CFR Part 50, Appendix R, sets forth fire protection features required to satisfy general design Criterion 3 of the Commission's regulations. Pursuant to 10 CFR Part 50, Appendix R, Section III. O, "Oil collection system for reactor coolant pump," the reactor coolant pump (RCP) shall be equipped with an oil collection system which " * * * shall be capable of collecting lube oil from all potential pressurized and unpressurized leakage sites in the RCP lube oil system."

When replacing the RCP motors with new motors and re-designed RCP lube oil system, physical interference and other design difficulties prevented four specific sites in the RCP motor lube oil system from accommodating an oil collection system for collecting potential oil leakage. By letter dated June 7, 1993, as supplemented March 28, 1994, the licensee submitted an exemption request to exclude these four specific sites from leakage protection. On October 7, 1994, as appended on September 17, 1996, the NRC granted the requested exemption because it was determined that a collection system at the four specific sites was not necessary to achieve the underlying purpose of the regulation.

By letter dated November 13, 1997, the licensee informed the NRC that modifications had been made to the RCP Oil Collection System such that collection coverage for these four potential leakage sites was assured, and that the Crystal River Unit 3 RCP Oil Collection System now conforms to the requirements of 10 CFR Part 50, Appendix R, Section III. O. In the FPC
